

Experimental Watercolor Materials List

Instructor: Melissa Tai

This class is for students with at least some watercolor experience. Whatever watercolor materials currently use will work fine, we will be exploring with household products. It is not required to purchase any of these items. If you do not have something, it is fine if you just attend and watch.

Items that will be used over the weeks:

Dec 8 – salt – table, kosher, or rock. They all work a little differently. Try one or all.

Dec 15 – plastic grocery bag, bread bag or similar

Dec 22 - wax candle and/or white/clear crayon

Dec 29 – No Class

Jan 5 – isopropyl alcohol and cotton swabs or dropper

Jan 12 – credit card, gift card or similar – it will not be ruined

Jan 19 - drinking straw or similar (can blow air through) thinner is better
